Session : Core10

Introduction to single dimensional arrays

About *Brandon Long*

LearnDelphi.org

Coding Boot Camp 2022

- Teacher of Information Technology (programming), Computer Applications Technology (computer literacy) and Mathematics
- Currently teaching in a high school in Gqeberha, South Africa and has taught in Auckland, New Zealand.
- Create programming videos (and other computer content) for my YouTube channels. Search for ***Mr Long IT and CAT*** 
- Embarcadero MVP
- Loves superheroes 

Session outline

LearnDelphi.org
Coding Boot Camp 2022

- What is an *array*?
- How to declare an *array*
- Initialising an *array*
- Assigning values to an *array*
- Displaying an *array*
- Calculations on *arrays*

Textbook reference chapters

Chapter **14**

Arrays

Pages 229 - 236

What is an *array*?

LearnDelphi.org
Coding Boot Camp 2022

```
var rTime : real ;
```

```
begin
```

```
  rTime := 13.26 ;
```

rTime

13.26

13.26 

What is an *array*?

LearnDelphi.org
Coding Boot Camp 2022

```
var rTime1, rTime2: real ;
```

```
begin
```

```
rTime1 := 13.26 ;
```

```
rTime2 := 13.01 ;
```

rTime1

13.26

rTime2

13.01

13.01

What is an *array*?

`var rTime1, rTime2, rTime3, rTime4, ... : real ;`

`be`
`rTime1 := 13.26 ;`
`rTime2 := 13.01 ;`

What is an *array*?

LearnDelphi.org

Coding Boot Camp 2022

```
var rTime1, rTime2, rTime3, rTime4, ... : real ;
```

be *rTime4* *rTime3*

rTime5

```
rTime1 := 13.26 ;
```

```
rTime2 := 13.01 ;
```

1	2	3	4	5	6	...
13.26	13.01					

What is an *array*?

LearnDelphi.org
Coding Boot Camp 2022

```
var arrTimes : array[ 1 .. 10 ] of real ;
```

arrTimes

begin

INDEX

VALUE

1	2	3	4	5	6	...
13.26	13.01					

What is an *array*?

LearnDelphi.org
Coding Boot Camp 2022

```
var arrTimes : array[ 1 .. 10 ] of real ;
```

arrTimes

begin

INDEX

VALUE

1	2	3	4	5	6	...
13.26	13.01					

value 13.01 at index 2

What is an *array*?

LearnDelphi.org
Coding Boot Camp 2022

```
var arrTimes : array[ 1 .. 10 ] of real ;
```

arrTimes

begin

INDEX

VALUE

<i>1</i>	<i>2</i>	<i>3</i>	<i>4</i>	<i>5</i>	<i>6</i>	<i>...</i>
13.26	13.01	12.86				

```
arrTimes[ 3 ] := 12.86 ;
```

How to declare an *array*

LearnDelphi.org

Coding Boot Camp 2022

<array name> : array [<lower> .. <upper>] of <data type> ;

var arrTimes : array[1 .. 10] of real ;

arrYears : array[8 .. 12] of integer ;

arrList : array[-5 .. 5] of string ;

arrGrades : array['A' .. 'F'] of integer ;

INDEX = characters

arrGrades

begin

A	B	C	D	E	F

Calculations on *arrays*

LearnDelphi.org

Coding Boot Camp 2022

- Average of an array
- Minimum value in an array (min)
- Insert into an array
- Remove from an array
- Merge two arrays
- Search through an array
- Sort an array

Insertion Sort
for j from 2 to end of array
 key = array[j]
 i = j-1
 while array[i] > key AND i > 0
 array[i+1] = array[i]
 i := i - 1
 array[i+1] = key

Arrays summary

- Array: single data structure that can store many values
- Each value will be of the same data type as the others

1	2	3	4	5
ABC	XYZ	MNO	STR	DEF

1	2	3	4	5
13.26	13.01	12.95	12.85	13.15

Arrays summary

- Array: single data structure that can store many values

- ***<array name> : array [<lower> .. <upper>] of <data type> ;***

- position

- Declare an array

Arrays summary

LearnDelphi.org

Coding Boot Camp 2022

- Array: single data structure that can store many values
- Each value will be different from others
- Each cell has an index or position
- Declare an array
- Assign values to an array

<array name>[<position>] := <value> ;

arrTimes[3] := 13.25 ;

Arrays summary

LearnDelphi.org

Coding Boot Camp 2022

- Array: single data structure that can store many values
- Each value will be of the same data type as the others
- Each cell has an index / position
- Declare an array
- Assign values to array
- Loop / traverse an array
- Display / Sum / Minimum
- Already established algorithms that you can use

for $i := \text{<lower bound>}$ to <upper bound> do
